SNP40IO IMI

ANNUAL RESULTS 2000 APPROVED

Turin, 27 March 2001 - The Board of Directors today approved the SANPAOLO IMI Group results for 2000, which fully confirm the fourth quarter results announced on 13 February. A brief summary of these results shows the growth in all the consolidated income statement lines:

- Net interest income: +7.2%, thanks above all to the positive performance in customer volumes;
- Net commissions: +19.5%, above all in the positive performance in asset management;
- Net interest and other banking income: +10.5%;
- Administrative expenses: +7.5%, principally as a result of significant investments aimed at strengthening the sales network and new technology channels;
- Ordinary income: +20.1%;
- Consolidated net income: Euro 1,292 million (2,502 billion lire) with an annual increase of 23%:
- **RoE: 18.1%**, compared to 14% in 1999.

The **Parent Bank results** for the year show instead net income of 1,198 million Euro, with an increase of 17.7%. The Shareholders' Meeting, called for 27, 28 and 30 April on first, second and third call, will be asked to approve the distribution of a **dividend per share of L. 1,100** (approximately €0.568), 10% more than last year. Ex-dividend and payment dates are set for 21 May and 24 May.

The consolidated and the Parent Bank financial results will be published with the related reports of the Board of Statutory Auditors and the Auditors and deposited according to law.

The 2001/2003 three-year plan, approved by the Board of Directors at the beginning of the year, confirms and strengthens the guidelines followed by the Group in its external and internal initiatives, and has set itself a RoE target of 22% in 2003. The continuing slowdown which is marking the major world economies and the high volatility in the financial markets could however temporarily rein in Group profitability. Group results for the first three months of 2001 will be further influenced in comparison with the first quarter of 2000 which registered the highest income figures of the whole year; a decline in net commissions from services, in part compensated by the growth in net interest income and the reduction in adjustments to loans following the continuing improvement in asset quality, is envisaged. Following quarters should show a return to the growth trend in profit margins.
